

SMTrue Run Optimize Software

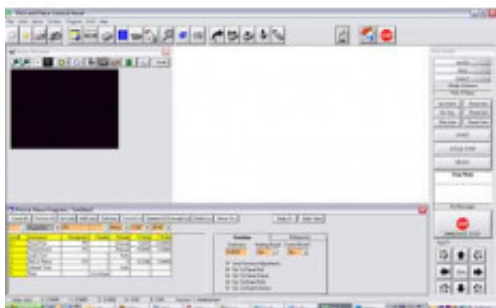

Brand: DDM Novastar

Product Code: 013803049541

Availability: In Stock

Weight: 0.00kg

Dimensions: 0.00cm x 0.00cm x 0.00cm

Short Description

Off-line programming and management software module for increased efficiency and throughput.

Description

For use with LS, LE, and CS series automated SMT pick and place machines, **SMTrueTM Run Optimize Software** provides an off-line tool for setting up new SMT assembly programs or modifying existing SMT assembly programs, saving you time and enabling you to prepare for a run prior to stepping in front of the machine.

The SMTrue Run Optimize Software is the same software used on your automated pick and place machine.

- Off-line programming capability for setting up new SMT assembly programs or modifying existing SMT assembly programs
- Increase throughput by programming jobs while your pick and place machine runs
- Incorporates Universal CAD Translator (UCT) software
- Provides off-line job and feeder set-up, programming, optimization, and management for your LS, LE, and CS series automated pick and place machine
- User-friendly, intuitive, easy-to-learn software
